

# Definition, Target, Parameters:

## Service Member Illicit Drug Positive Rate

**Measure Definition:** *Quarterly Illicit Drug Positive Rate* is the number of service members with an illicit drug\* positive specimen in the calendar year divided by the number of unique service members tested

**High risk populations (18-25 year old enlisted males) to be highlighted**

**Strategic Target:** Less than 2% of service members tested

**Annual Target:** Less than 2% of service members tested

**Positive drug test results must be reviewed by the Medical Review Office (MRO) to determine if the positive result is violation of policy (e.g., whether someone had a prescription or whether they were taking it illegally)**

**Parameters:**

<b>Green</b> 	<b>Less than 2% of service members tested</b>
<b>Yellow</b> 	<b>Greater than 2% but Less than 3% of service members tested</b>
<b>Red</b> 	<b>Greater than 3% of service members tested</b>

1) Illicit Drugs Prior to 2007: Marijuana, Cocaine, d-Methamphetamine, PCP, Ecstasy, Heroin

2) Illicit Drugs Starting 2007: Marijuana, Cocaine, d-Methamphetamine, d-Amphetamine, PCP, Ecstasy, Heroin, Codeine, Morphine, Oxycodone, Oxymorphone
